

Bootstrap course – Lab 2

1. Design a responsive navigation bar like the one shown below (Bonus: Create the title, search box and action buttons bar shown below the navigation bar)

2. Create a login form containing a username and password and a “Sign in” button. If username or password is left empty when clicking “Sign in”, the field should be highlighted using Bootstrap error highlighting, along with an error alert message “You can’t leave this field empty”
